

Don't delay in booking your breast screening appointment!

Early detection saves lives so it is important to attend your breast screening appointment and to check your breasts regularly. If you notice any changes, contact your GP.

Worried about booking your appointment and not sure what to expect. Here's what a patient said about her screening experience

'The whole process of going for breast screening was smooth, simple and reassuring, from booking the appointment to the actual breast screening process itself. At all times the staff were calm, professional, respectful and friendly.

I was put at ease at all times and was able to book an appointment at a time and place to suit me.

All covid precautions were taken by staff at the Thomas Linacre Mobile Unit, where I chose to go. From entering the unit to leaving, my appointment was completed efficiently and took less time than I had envisaged.

The actual process of screening was explained clearly and undertaken calmly and efficiently. I was asked if I was comfortable at every stage of the screening process. At no time did I feel uncomfortable or embarrassed during the screening process.

Thank you to all the staff involved.

I would encourage every woman to attend for breast screening if they are offered an appointment.'

Have you had your breast screening?

Breast screening can diagnose breast cancer early and helps save lives. Remember to attend your screening appointment when you are invited!

Worried about your appointment or unsure what to expect? Here's what a patient told us about her screening experience:
